PERSONAL PROJECTS

ERP Model (11/2022 - 02/2023)
- Developed a ERP model using node.js, express and MySQL . In this project there are three actors admin, manager, employee. The admin is able to create his team and assign permissions to actors . The manager is able to assign daily tasks to its employees. The employee can update it's daily work status .Finally , all the actors are able to update their personal and professional details.

Weather App (09/2022 - 09/2022)
- Developed a weather app in JavaScript using Accuweather API. Here, i learned how to use fetch API and promises. In this app, we are able to search weather of any city and able to display the temperature and other things with help of API.

Memory Game (10/2022 - 10/2022)
- Developed a game in react. This game is a common game played with set of cards. The cards have a picture on one side and each picture appears on two cards. The game starts with all the cards faced down and players take turns to turn over two cards

Recipe Directory (09/2022 - 09/2022)
- Developed a simple app using react and json server. In this app we create recipe and stored the data inside json server .Also there is a functionality to search recipe and render those recipe components on home page
